About

Freedom to Use, Share, and Modify Responsibly

We created this license to promote openness, collaboration, and responsible use of our software. It lets you use, copy, share, and modify the software for your business needs, with the condition that any changes you make must be shared openly under licenses like MIT, BSD, Apache 2.0, or Creative Commons Zero. Personal configuration files, like .yaml or .json, don't need to be shared.

The licence also protects the original creator's work, ensuring copyright and licensing notices stay intact. While we grant you patent rights to use the software, those rights don't extend to modifications.

We hope you make the most of these tools, innovate, and share your improvements with others. If you have any questions, don't hesitate to reach out to us —we're here to help!

Acceptance

By using the software, you agree to all of the terms and conditions below.

Copyright Licence

The licensor grants you a non-exclusive, royalty-free, worldwide, non-sublicensable, non-transferable licence to use, copy, distribute, make available, and prepare derivative works of the software, in each case subject to the limitations and conditions below.

Limitations and Conditions

You may use the software for your internal business purposes.

If you modify the software, and provide the software to others, (a) you must make your modified software publicly available in source code form free of charge under this licence; and (b) you must add your modified software to the list of published plugins at https://raw.githubusercontent.com/logleads/NATM8/refs/heads/main/FORK.json.

The software as a whole must remain under this licence, but your changes must be made freely available under the MIT, BSD or Apache 2.0 licence, or the Creative Commons Zero public domain dedication. This obligation applies to source code only. Modified local configuration files like .yaml, .json and parameter files are not required to be shared publicly.

You may not alter, remove, or obscure any licensing, copyright, or other notices of the licensor in the software. Any use of the licensor's trademarks is subject to applicable law.

Patents

The licensor grants you a licence, under any patent claims the licensor can licence, or becomes able to licence, to make, have made, use, sell, offer for sale, import and have imported the software, in each case subject to the limitations and conditions in this licence. This licence does not cover any patent claims that you cause to be infringed by modifications or additions to the software. If you or your company make any written claim that the software infringes or contributes to infringement of any patent, your patent licence for the software granted under these terms ends immediately. If your company makes such a claim, your patent licence ends immediately for work on behalf of your company.

Notices

If you modify the software, you must include in any modified copies of the software prominent notices stating that you have modified the software.

No Other Rights

These terms do not imply any licences other than those expressly granted in these terms.

Termination

If you use the software in violation of these terms, such use is not licensed, and your licences will automatically terminate. If the licensor provides you with a notice of your violation, and you cease all violations of this licence no later than 30 days after you receive that notice, your licences will be reinstated retroactively. However, if you violate these terms after such reinstatement, any additional violation of these terms will cause your licences to terminate automatically and permanently.

No Liability

As far as the law allows, the software comes as is, without any warranty or condition, and the licensor will not be liable to you for any damages arising out of these terms or the use or nature of the software, under any kind of legal claim.

Jurisdiction and Governing Law

This licence is governed by the laws of New South Wales, Australia. Any disputes will be resolved in the courts of New South Wales.

Definitions

Licensor	LogLeads Compendium Pty Ltd.
Licensee/You	refers to the individual or entity agreeing to these terms
Your company	is any legal entity, sole proprietorship, or other kind of organisation that you work for, plus all organisations that have control over, are under the control of, or are under common control with that organisation. Control means ownership of substantially all the assets of an entity, or the power to direct its management and policies by vote, contract, or otherwise. Control can be direct or indirect.
Your licences	are all the licences granted to you for the software under these terms.
Use	means anything you do with the software requiring one of your licences.
Trademark	means trademarks, service marks, and similar rights.
Software	refers to code with interpreted or compiled languages, such as .js, .go, .ps1, and .sh. UI files like .html, .css, and .js.
Upstream and downstream dependency	means a service or system that is integrated with the software and partially or fully managed on behalf of you, where managed means that configuration changes are made to the device or service, such as when another system to which a connection string for the software is configured, trust relationship is established using the software, or data is communicated through devices or systems via the software, or using the software as a backend component in that device or system's own connection string
Derivative work, or Software development	means any alteration in the source code: changing the look and feel (web UI), adding a new feature or capability, or altering business logic such as search, authentication, authorisation, data retrieval, data visualisation, or templates.
Configuration of the Software	refers to modified local configuration files like .yaml, .json and parameter files. Less than 10% modification of the code lines of the published infrastructure as code (CloudFormation) templates. Anything above 10% modification of these templates falls under the development category.
